

# SECURITY ACCREDITATION SERVICES

Contact: 01963 34444

## Security Accreditation Services

ALS has developed a team of CLAS supported engineers that can deliver accreditation to both our own system designs and those of our customers.

This is achieved through sound security engineering practices including:

- Rigorous Security Risk Assessments
- Thorough application of the HMG IA Standard No. 1 processes
- Presentation of sound Risk Mitigation argument through use of the Security Policy Framework

## Security Assurance Coordinator Services

ALS offers a security engineering Customer Friend relationship through client-side management of the Accreditation Process (including the management of all Security Working Groups).

ALS will provide Security Assurance Coordinator capabilities at your site that will undertake on your behalf:

- Mapping of security engineering activities to the requirements of the programme/project plan
- Production of Risk Balance material for Risk Balance Cases
- Management of the Tier 1 delivery of the Security Architecture.

## Security Architecture Reviews of 3<sup>rd</sup> Party Systems

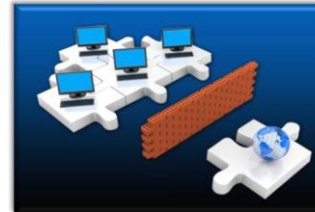

ALS offers a customer relationship designed to offset programme delivery risk through a thorough review of 3<sup>rd</sup> party security architectures against the agreed Risk Profile.

- Confirmation of the completeness and applicability of the agreed Risk Profile.
- Review of the selected security components for applicability, efficacy and residual strength.

## Forensic Reviews of 3rd party Security Architectures

ALS offers Security Engineering support services to 3<sup>rd</sup> party customers through forensic reviews of failing 3<sup>rd</sup> party security architectures.

**Holistic & Efficient**  
*Secure your Architecture now  
and in the future.*

- Confirmation of the completeness of the Security Architecture
- Confirmation that the security operation of the architecture is holistic and efficient
- Identification of potential weaknesses in the Security Architecture
- Identification of appropriate weakness mitigation paths

## Quality and Security that Matters

***We will guarantee that your trust in us will be respected through our extensive quality and security controls.***

Our Quality standards conform to the following:

- The standard is - **ISO 9001:2008 TickIT**
- Name of Certification body - **BSI Management Systems**
- Accreditation body - **UKAS**

The ALS facility is also a fully accredited site to manage the security of the support activities together with any appropriate documentation; all will be kept under strict baseline control, providing long term confidence and support to our customers.
